## BERMUDIAN SPRINGS SCHOOL DISTRICT

## OFFICE OF THE ASSISTANT TO THE SUPERINTENDENT

## Roger H. Stroup <br> STUDENT DATA REPORT - NARRATIVE HIGHLIGHTS

## PSAT

The Preliminary Scholastic Aptitude Test (PSAT) represent the scores students should meet or exceed to be considered on track to be college or career ready. Sixty-five (65) students participated in the exam. Bermudian students scored significantly above both the state and national averages on all subtests.

## SAT

During the 2015-16 school year, a total of seventy-six (76) BSHS students were administered the Scholastic Aptitude Test (SAT). The average scores were

## COLLEGE IN THE HIGH SCHOOL

During the 2015-16 school year the district offered the following courses through the Harrisburg Area Community College: pre-calculus/calculus, statistics, history, English, and health. One hundred-five students participated in the respective programs, an increase of twenty (20) students from last year. Ninety six (96) students or $91 \%$ were eligible for college credit .

## DROP-OUT PROFILE

There was one (1) drop-out reported during the 2015-16 school year, which is the lowest an outstanding accomplishment and a tribute to the entire high school staff. Our summer school, credit recovery, and intervention opportunities continue to enable our students to be successful.

## SENIOR EXIT INTERVIEW

Ninety one (91\%) percent of the seniors report that they feel they had a good educational experience in the high school. Seventy five (75\%) percent would grade assign the high school a grade of A or B. Eighty three (83\%) percent participated in extracurricular activities in the high school.

## STAR ASSESMENTS/ACCELERATE READER MIDDLE SCHOOL

The STAR assessment is a thirty minute computer-based benchmark assessment that is administered four times to all students in grades 5-8 in reading and math. Students in grades 5-8 read 9,467 books and demonstrated proficiency on 8,532 on the on-line comprehension quizzes, which is a $90 \%$ proficiency.

PSSA 2014-15 (2016 results will be available in late summer)
During the 2014-15 school year students in grades 3-8 were tested in math and reading. Bermudian Springs students scored above the state level in ELA in all grades 3-8. Bermudian Springs students scored above the state level in math in grades 3-7.

KEYSTONE EXAMS 2015 (2016 results will be available in late summer)
During the 2014-15 school year keystone exam proficiency scores were as follows: math 73\% (PA 64\%), literature 77\% (PA 73\%), and biology 56\% (PA 59\%).

# BERMUDIAN SPRINGS HIGH SCHOOL 2014-2015 GRADUATE SURVEY - 19 responses 

## In what way were the curricula/programs in BSSD helpful?

Teachers like XXX and XXX really prepared me for the difficulty of college level classes.
Helped with preparation for real-world scenarios
They helped prepare me for the classes I am taking.
I had a clear advantage with writing skills than the majority of students at college
They helped prepare me for college life
hardly helpful
Ms.XXX's CP English 12 helped me the most for writing and reading. However, Mrs. XXX 's government class
helped me prepare for the rigorous material of college
The only class that is similar to college was Mr. XXX 's CHS class
Showed time saving skills
gave a basic knowledge of topic
What suggestions can you offer that might improved the educational program in BSSD?
Have XXX teach everything because he's a boss. Seriously though I thought our school was pretty good.
More evidence-based/real-world applications involved in lessons
Less lecture
Promote higher classes.
They need to be harder and less spoonfeeding
Be less lenient with due dates and exams.
Offer more college/AP courses
Teach the kids time saving skills
Include exercises in free writing; not a single essay I've written so far adhered to a format used at Bermudian
More CHS courses
More homework
More responsibility and accountability

## What was the biggest adjustment that needed to be made as a freshman?

Learning to live away from home.
Time management
Living in a new area with a diverse population
Studying
The difficulty in tests.
Adjusting to people of different mindsets, political views, etc.
The biggest adjustment was having to take notes during lectures
how to study and take hard exams. I had a very hard adjustment and i was a straight A student that didnt struggle at all in high school
Being prepared
Allocating free time and dealing with heavier workload
Time management
Making friends,time management
Needed to study more frequently and efficient
Everything

## WHY DID YOU SELECT THE COURSES YOU TOOK IN HIGH SCHOOL?

Because I felt like it
Art ,Culinary \& Greenhouse
I wanted to get to know more people.
In order to prepare myself for college, and help benefit me in the future.
I chose what I thought would be easy and what I would like.
The reason that I chose the classes that I chose in High School was to mainly achieve a higher understanding in the field of education, and to learn as much as I could in the amount of time that was provided for me.
They interested me
At first it was for a certain career choice, but I changed my mind about it.
I selected these courses because I wanted a challenge.
They were the courses that best fit my interests and abilities.
They were challenging but not too hard.
Very few teachers made me think I could take CP classes
I chose what was interseting
I felt like they were the right courses for me
For hands on learning and stuff I liked
I chose according to my future career path.
The teachers
Focused most of my courses around preparing myself for college and business.
i wanted to challenge myself
They were courses that interested me
To challenge myself and set myself up for success in college and beyond
They were easy courses, and I didn't want to do much work.
French
to prepare for college
I wasn't sure what level of classes to take.
I choose those courses because I felt that they were for me and that I was going to good on them.
I wanted to have a challenge but not too much where I wouldn't graduate and for college.
Chose courses to prepare for future goals
I selected the courses that I thought I could handle.
They were the pace I felt the most comfortable in
Well... to prepare for college
I took college prep because I'm smart but not that smart
So that I was well prepared in the future. Except there were some courses I wish the school did have that would have helped me with courses I will be taking in the college. There should be more credits that are not based on farming.
I chose honors courses to challenge myself and prepare myself for college and electives that I was interested in.
I selected them based off what I thought would best fit my capability.

## Bermudian Springs High School Senior Exit Interview 2015-2016 <br> Total \# Responses: 130

To prepare me for college
they were benefits of what I want to do when I graduate.
I wanted to be prepared for college.
I wanted to push myself academically and be able to grow as a student as I planned to attend college after graduation.
To prepare me for college
For college
To help understand the basics of what my chosen career would entail
I would do better in every single class I had
They allowed me to have a interest in them.
I was interested in them
because there around the interests I like
They were what was suggested for me to take.
linterests and skill level
I either thought I would like them or I thought they would be an easy credit
I chose what I was interested in
It was based on my interest.
Because I thought that they would be the best fit for me.
I thought they would challenge me and better prepare me for college
I took a selection of Honors and College Prep classes so I could challenge myself but not be too overwhelmed.
Prepare for collage
I thought they were the right level.
I selected them based on my interests.
To further my interests in a variety of things and finally decide my future career.
I wanted to challenge myself.
To prepare for college and around my major I was considering.
I want to go 2 college
They looked interesting
I picked them based on the amount of interest I had in each subject
they seemed pretty interesting and it was stuff I wanted to learn about.
It was easy.
They interested me and will benefit me in college
For being successful in life and hands on
Experience
They were courses that generally interested me.
they were a little easier for me
To better develop my learning skills and to challenge myself
The courses I chose were the ones that interested or benefitted me the most
They were easier
To challenge myself and to be more prepared for college
Interest, the teachers
they looked and sounded fun
I was interested in the subject
I just took courses that interested me the most.
Challenging, most optimal choices for my career path
It best fit my major for college.
To prepare for the future
They were a little easier for me
For my own personal benefit.
I selected the courses I took, because I was interested in them and wanted to learn more about the topics.
College
I took a mix of college prep and honors courses, both to challenge myself and to impress colleges.
I took the most advanced courses that I could take to engage with other driven students in our school and to build my resume for college.
Interest
To get by

# Bermudian Springs High School Senior Exit Interview 2015-2016 <br> Total \# Responses: 130 

I selected the ones that interested me.
Because I didn't want to take 20 different Ag courses
For my Career
balancing "I don't want to be bored" with "I don't want to work that hard"
I picked the classes I thought I would do my best in.
I selected these courses because I felt that they would help and challenge me the most during high school. I also felt that they would be the most useful in college.
I felt they were for the best for me to take with what I want to do.
To be successful later on in life with college and my career.
Easier than honors
Based on my interest.
Preparing myself for college
I felt prepared for a challenge. Also, many of my friends took Honors courses.
I was smart enough for CP but too dumb for Honors.
I thought about the career that I wanted and chose classes accordingly.
Whatever was easiest to get into, otherwise random.
Easiest
I selected the courses that would best prepare me for outside situations I would face in the career choice I selected.
They benefit the future I am looking into. Also a lot of the courses are required for college
I enjoy them
I went with what the teachers recommended me to go with.
I took courses that I felt would help me in the future, because up until senior year I had no clue what I wanted to do. I wanted to prepare myself for college and challenge myself throughout my high school experience.

I plan on going into the business world after high school so I signed up for things I thought would best prepare me for the outside world.
I had interest in these classes
I selected them to prepare myself for college.
I selected the courses to prepare me for my future schooling and career.
I knew those classes were the best fit for me and would challenge me.
I wanted a challenge and preparation for college
I selected the courses I took in high school because it best fitted my academic ability, but I could've took more honors classes.
I selected the courses I took because I believed they best fit with my learning.
These courses challenged my knowledge, and they will benefit me in the future.
I'm good at being mediocre.
I found them interesting or I was told that they would be fun classes.
To challenge myself and prepare myself for college
I took courses that I thought would challenge me and be intellectually stimulating.
So that I could be prepared for college and life after high school. I took the classes I did so that I could succeed in my career.
To maximize my capabilities
Because I initially wanted to attend college.
They challenged me

# Bermudian Springs High School Senior Exit Interview 2015-2016 <br> Total \# Responses: 130 

## Briefly comment on your educational experience

## Challenging

I struggled with my grades, but overall had a good education
In all honesty the classes were decent. I do wish that the teachers in general would be a little lighter on the paper work considering I have had to empty out my folder multiple times, and on top of that have had to work on the assignment
from when I got home until I went to bed at nine.
The teachers were helpful, but overall not to bad
It was pretty good
AMAZING
My educational experience did a fairly good job at preparing me for college, if I choose to go.
It was adequate.
Teachers sucked
Most teachers greatly benefitted my learning experience with challenging activities and interesting topics.
There were more options and resources I wish I had that I see many other schools having. We do not offer that many business courses besides some basic accounting which is for the most part outdated. The stuff $\mathbf{X X X X X X X}$ teaches on taxes is good but when he turns to the books they are very outdated.
XXXXX was the worst experience because he got into kids drama and made fun of them to other kids.
My educational experience was fun as well as easy
I feel I have learned a good deal of information and skills, most of which is useful
Most teachers were a pleasure to have, the classes were worth the hassle. I learned a lot in each of these classes.
went good
I like how the majority of the teachers took the time to help me out when I was not on track with the rest of my peers.
My first two years weren't to great, but my last two years were really good.
The school has a well done education an people learn just fine.
It was good, I hated having to wake up so early every day. If not for that it would've been excellent.
Absolutely Radtastic
It was decent, there are improvements that could be made
good, except I don't remember learning a lot on black history or women's history.
I thought that the teachers are very helpful and they are easy to relate to. There were plenty of opportunities to talk to a teacher if I needed help with anything whatsoever. The teachers seem to really care about our education and made it an easy and fun environment to learn.
I got in a lot of trouble because of teachers and XXXXX.
Almost all of the teachers genuinely cared about the students and that created such a positive, comfortable learning environment. They were always happy to help and I feel that I grew a lot. Could have been pushed harder, but ultimately was very good.
It was tough at some points, but over all I think I did well and is prepared for college.
School is school.
The school is unable to accommodate different circumstances.
Most of the teachers have a good teaching method.
The educational experience was very broad by getting to choose different things you may be interested in.
It wasn't bad
I learned a lot I believe will benefit me for my future education
good
It was good.
Good experience, meaningful
At times hard, or boring, but there were fun classes and rewarding classes as well.
I feel that compared to other schools in our area, we get a very good education.
im nyt gonna say it was gr8 butt it
was okay
It felt long
most of the teachers were pretty good.
My education was fairly alright.
I enjoyed high school but our class selection should have some changes made. We need more options because I began to run out of choices that interest me
Lots of mandatory classes with electives being hands on
The teachers were almost always more than happy to help when we were struggling, and they did well at explaining it the first time in most cases.

## Bermudian Springs High School Senior Exit Interview 2015-2016 <br> Total \# Responses: 130

There was barely any focus on learning stuff you need outside of school to actually make it through life.
Good
Felt like it would be like any other school.
It was good.
There are things that are honestly pointless to everyone no matter who you are, and teachers that need to get there stuff straight as well but overall it was okay.
For the most part it was fairly easy but a lot of work
I know math basics but don't know how to buy a house or manage my bank account.
I think my educational experience was a good one at Bermudian Springs.
Our school provides a lot of good opportunities to advanced students through honors and CHS courses, but CHS courses put top students at a disadvantage because they sometimes only transfer to state schools. For example, none of my 15 CHS credits will transfer to my university. AP credits would have transferred.
easy. Should have pushed myself harder
It was exciting and rigorous.
The teachers were helpful
It was lit
I think I have a very good education to bring to college. The teachers were very helpful in my learning at Bermudian Springs.
My education was good. I believe that it challenged me but not too hard that I did not fail any of the classes I chose.
Most of the teachers I had were very understanding with multiple classes that you had to worry about. Some of my teachers just all around sucked though.
The rigor of some courses helps me feel prepared for college classes.
meaningful
The only thing that I really disliked was having to do group projects because I always ended up doing them by myself. Everyone always got credit for my work.

Don't remember any of it.

## Boring

Teachers made students feel welcomed and helped us throughout the years.
I'm grateful for my experience but opportunity for electives and classes for business were very limited.
It pushed me to do my best and
enjoy everyday.
Almost all of my classes, I walked out with a better knowledge on the subject. All of the teachers made sure the material was understood, and helped along the way.
I have been blessed with a great teaching staff who have supported me along the way. They often times would challenge me and help me become successful.
I have learned a lot through my high school experience and I think I will truly benefit from it.
My educational experience has been great from learning to the teachers
My educational experience was very enjoyable and i do not want to leave.
It was great
I think it was very beneficial and learned a lot.
Educational?
Some of the teachers piled up the workload on us students. We have lives and we want to enjoy ourselves and not be stuck in our rooms working on homework all night.
First of all, I have learned a lot of information from the classes I took, but I wish that students could learn more about life outside of high school, rather than focusing on books. Second of all, I think that I would have preferred block scheduling as a high school student. There would be less stress when it comes to assignments, people involved in extracurricular activities could have more time to work on them, and we could have the option of graduating early. Overall, though, it was a good experience.
For the most part, there were many courses that weren't offered that I would of liked to see.
I learned the most from XXXXX and with his help, I will follow my career path.
It sucked school is a joke

## WHY WAS THE SUBJECT YOU LISTED YOUR FAVORITE?

There is only one answer to the problems
Very important to know about the history of the U.S., good to know about the value of money and important to know how to use your money, and well English is always used in this country, we should all know how to spell and speak good English outside of school.
I love numbers.
I love writing.
I personally think it is one of the only classes we need because it tells us about how things were before our time.
The reason that Steal band was one of my favorite subjects is because the music was different. The band really comes alive with the music that was played throughout the years, and every single year there are more songs added to the Steal Band collection, making the Steal Band a place of joy for the students to experience.
Good teacher
The teacher is great and so is the class.
It lets me show my creativity
Because of Ms XXXX and Mr XXXXX
I think that it is valuable to have a second language, and Mrs. XXXX gave excellent instruction and made it enjoyable.

## Bermudian Springs High School Senior Exit Interview 2015-2016 <br> Total \# Responses: 130

This is what I want I am going to college for.
I loved being able to learn new things all the time, and $X X X X X$ is one of the best teachers l've ever had.
it was more hands on and practical for real life
I have an extreme interest in history.
I have a farm background
It's something I actually enjoyed doing
because I got to eat
Great teachers, great subject material, laid back environment, interesting projects
I've always had an interest in it.
Mr. XXXX is by far one of the best teachers in the school in his delivery of the material and they way he communicates and interacts with students.
One of my Favorite things to learn about plus great teacher!
They were easy and fun
It is practical
Mr. XXXX is a Fantastic teacher, he helped me through my entire high school year, he also taught extremely well. the class was Semi- Challenging.
learn more than plants
I love learning new languages
It taught me a lot about business which I was extremely interested in.
I like to learn about stuff an events that already happened
For the most part math comes easy to me and I enjoy it.
The teacher is nice and the material is interesting
Because I have a deep interest in it, plus it comes easily to me.
It just was
Because of Mrs. XXXXX <3
I was very attached to the steel band and I took it all 4 years of high school.
gave me a chance to express myself
Math comes easy to me and those were two classes i enjoyed going to because i liked doing the work.
They both interested me a lot.
I always loved math and I want to be a math teacher
it was fun
It is the subject I feel that I am best at
I really enjoy literature and writing. Also, my English teachers were always my favorite.
Cause I love math and dealing with numbers
The teachers in the math department
It allowed me to specialize in my chosen career
it was easy for me to understand
you could play sports.
I really like math
I like learning about what happened before I was born
Mrs XXXX is the best teacher at the school.
I enjoy the freedom of the class and the teacher.
The classes are fun and Mr. XXXX talks about real life things that will help you in the future like taxes.
I liked all the projects
It is what I want to do in life
Because Mr. XXXXX is the best teacher at it
Bermudian springs.
Science interests me and it is based on my major
It was a challenge and could be fun when it wasn't frustrating.
Easy
I enjoyed it a lot.
It is what I had to most fun learning, and am majoring in in college
It got students to experience something new that they would never have done before. Also it gets students more active in learning/playing and the concerts make students feel amazing when the audience starts clapping for them.
I like math.

## Bermudian Springs High School Senior Exit Interview 2015-2016 <br> Total \# Responses: 130

It interested me and the teachers were all willing to help make the class fun.
bc im gurd at it
It was interesting
History has always been one of my favorite things to learn about.
Seemed like a good idea at the time?
Mr. xxxx is well spirited teacher the reason I will come to was to come see him, he's one of the teachers few I respect and have help me threw out high school career.
It was easy and interested me and most of the teachers were cool
Any science programs I felt I understood fairly well except Chem.
It dealt with what I want to do in the future the most.
I do nothing but watching movies
My teacher my junior and senior year was my favorite teacher in all my years of school
Everything about it was interesting and Mrs. XXX made the class so much fun.
I like to write
I'm going to be a radiologist and I want to be able to know everything in the body
Best teachers
it was interesting
All the teacher that I got for math were really nice and I understood everything which made it easy.
Most interesting
Mr. XXXX knows how to teach from an academic standpoint and encourages discussions in class.
I'm the best at anything related to Ag.
it was a lot of hands on work and I learned a lot about welding and electrical wiring
I think it's an easy class.
It had me involved and others as well, made it exciting.
My agricultural classes is my favorite because I enjoy being in Ag, and the experiences it gave me to participate in.
The majority of history teachers at this school teach to educate instead of teaching to test. They tended to be more personable, and provided the most insight into what is actually important in life.
I enjoy reading novels and I learned a lot throughout my writing instruction, especially this year in Ms. XXXX's CHS English class.
I like science
I am interested in a career in this field
The teacher. Mrs. XXXX was always there to help out students individually. She made math interesting and fun.
Because I actually felt like I truly learned something that will help me in life.
I find certain things in history interesting
quality teachers
The teacher always helped me if I needed help and I was never afraid to ask him anything.
Government/Economics
I always had an interest in learning what happened around the world to get us where we are at today.
It is the field I want to go into and I enjoyed the stimulation.
I enjoy using our computer programs
teachers made it fun and interesting
Science is always interesting, there is always more to learn
The instructors
Easy for me to understand.
Mr. XXXX made his learning environment a comfortable place to and a fun place. He is very knowledgeable and taught very well. I got to feel like I was better than everyone else because I could actually figure out what I was doing.
Just cause
I love learning about the body and the way it works.
The topic interests me and the teacher was good at his job
Raised in a agriculture background
I enjoy it and it comes very easy to me.
I always enjoyed studying society, and taking sociology helped me understand more about society. I also really enjoyed the teacher, and how he teaches.
I have always loved the English department teachers. I enjoyed reading the different books and learning to become a better writer. I deeply enjoyed this class because of the teacher and the loose structure of the class which gives way to a more creative output and open environment to work and challenge myself in.
I could easily relate

# Bermudian Springs High School Senior Exit Interview 2015-2016 <br> Total \# Responses: 130 

It is my favorite because Mr. XXXX is such a phenomenal teacher.
Music is my favorite because that is what I plan to do and the future and it has always interested me.
I always found math classes fun and I enjoy the subject.
The teacher, Mr. XXXX, was awesome. Also, I just naturally love the subject.
Mrs. XXXX, she has made me into a better writer and taught me so much. I am glad to have had her as a teacher.
It was something that I didn't consider hard to learn and it was a lot of fun learning about other cultures.
I had a great teacher/instructor.
Cool class, but didn't turn into a psychic: 8/10.
I was always interested in math and loved to solve hard problems in my head, also its going to be part of my major in college.
I was encouraged to think outside of the box and engage with objects and materials in the classroom.
The courses were all fun while managing to not be extremely easy.
Tech Prep was my favorite because it had everything to do with the career I want to do.
I enjoyed the teacher and the class work. It is a field I am considering majoring in.
This was basically the only subject that meant anything to me. This is also the only subject that I will continue to use.
America is the greatest state on earth
Did you participate in extracurricular activities?

## WERE YOU GIVEN ADEQUATE OPPORTINITY TO PARTICIPATE IN EXTRACURRICULAR ACTIVITIES?

## Extra Curricular Activities comments:

There can always be more
Join a club and or some type of extracurricular activity it will help to relieve the stress of the week, and also help to make the week a little more interesting.
There were plenty of opportunities
Bermudian does a good job at giving equal opportunity for extracurricular activities.
idk
I play soccer
I wish we had a FBLA club but other than that it was all pretty good.
I did had an opportunity to any extracurricular activities.
I feel this way because you don't really ever not make it in a extracurricular activities so you have an equal opportunity but sometimes you can be treated unfairly.
The clubs here suck and there aren't enough options
FAVORITISM

## Bermudian Springs High School Senior Exit Interview 2015-2016 <br> Total \# Responses: 130

I was a cheerleader, was in chorus, and also in the musical.
There are tons of chances to get involved and I think that our school does a great job with that.
It was easy to go to sign ups and participate in the activities.
always offered to you.
I really enjoyed having the opportunity to be able to play soccer. Even though I didn't play all 4 years I had a great time playing the 2 years I did.
There should be more diverse opportunities offered.
Anyone is allowed to join these activities, and they are easy to join.
to be eligible was very easy to do for athletics
Always something you can do
Bermudian has provided me with countless opportunities to get involved in the school and community
There were a lot of opportunities.
Musical was fun cause of the amount of practice and the performing on stage was exciting while also nerve racking.
A huge work load on top of extracurricular activities.
im pretty much the most athletic kid that barmudian springs have sawn
I lifted instead
I had plenty of opportunities to participate in extracurricular activities.
Soccer had an amazing improvement through my years in the high school. More business opportunities would be nice though
Being involved helped keep my goals in line
I played football and basketball and had a great experience playing both.
I was involved in soccer, varsity club, chorus, and athletic training.
I do but I chose not to
not my thing.
It was easy to sign up and do the activities
I was only in one extracurricular activity.
I thoroughly enjoyed each and every musical.
Our school provided great opportunities for me in all extracurricular areas.
I am athletic, lovable, and creative
I wish there was an LGBT Community club at BSHS.
Quiz bowl for life
I love the sports program here and I'm glad I got to appreciate in it.
I felt like extracurricular activities gave a greater experience throughout high school.
Wrestling for Bermudian was one of the best things that happened to me, I created a close bond with pretty much the whole team and it was like another family to me. Coach McCollum taught me a lot of lessons that I can use throughout life. I will never forget my Bermudian Springs Wrestling experience.
I noticed a very equal opportunity to engage in extracurricular activities.
I participated in soccer, track, and ski club.
Some teachers piled on so much homework that when someone had a game they were tired and did not want to do the homework. Sports are encouraged in the school but the stress level from all the homework, tests, and everything else make the sports not as enjoyable.
I'm too lazy and I'd probably just annoy everyone.
Don't care
Although I love what Bermudian has given me in extracurricular activities, I strongly feel that the athletic department has an overwhelming sense of favoritism between athletes.
Wish there were more opportunity for business oriented opportunities such as clubs.
I participated in three sports every single year and then played two club sports outside of school. Also I was in FCCLA and Varsity club, NHS, and I was in chorus for two years.
I feel as if certain students were given more opportunities than other people depending on who they made friends with.
My extracurricular activities were my favorite part of high school. I really enjoyed playing sports and being involved in student council and NHS.
There was many choices
Participating in extracurriculars has helped my education experience.
Balancing school and sports was not always easy.

## Bermudian Springs High School Senior Exit Interview 2015-2016 <br> Total \# Responses: 130

Focus more on athletics.
For the most part, I had an adequate opportunity, but some directors and coaches make it difficult to be involved in more than one thing at a time. They can be inflexible.
We had football, that's all that matters.
There are a great number of clubs and activities available, many of which are strong programs in comparison to other schools in the area.

I have participated in many activities.
Wrestling

## Elementary PSSA Student Groups Over Time

## F\&P and PSSA Data 2011-2016

## UNDERSTANDING THE 2015 PSSA AND CUT SCORE CHANGES

The 2015 cut scores are based on the new PSSA based on PA Core Standards. The PA Core Standards are generally considered more challenging than Pennsylvania's previous Academic Content Standards. Because student achievement is now being assessed against more challenging standards, a smaller percentage of students will score proficient. However, lower proficiency rates are not an indicator that students are learning less or teachers are teaching less. The PSSA scores from 2014 and 2015 are not comparable because the student proficiency rates are derived from two very different tests that are based on two different sets of standards. These standards in English Language Arts, Mathematics, and Science and Technology identify what a student should know and be able to do at varying grade levels. School districts possess the freedom to design curriculum and instruction to ensure that students meet or exceed the standards' expectations. Every Pennsylvania student in grades 3 through 8 is assessed in English Language Arts and Math. Every Pennsylvania student in grades 4 and 8 is assessed in Science.
In July 2015, the Pennsylvania State Board of Education adopted cut scores for the newly redesigned PSSA ${ }^{2}$ that will result in significant changes to the percent of students in grades 3 to 8 scoring at each of the four performance levels ${ }^{1}$ on the mathematics and English language arts (ELA) assessments. The new PSSAs and related cut scores are explicitly designed to be more rigorous, making it noticeably harder for students to achieve advanced and proficient scores on the new PSSA in 2015 than on the previous test administered in 2014.

The lower percent of students state-wide scoring proficient or advanced on the new 2015 PSSA compared to 2014 is substantial as demonstrated in the charts below.

| Bermudian Springs Percent of Students Scoring Proficient \& Advanced vs State-wide Percentages on 13-14 PSSAs and Redesigned 14-15 PSSAs |  |  |  |  |  |  |  |  |  |  |

Gray Highlight Indicates BSSD Scores at or above State Levels

PDE has been clear that the lower proficiency rates in 2015 are a result of new tests and new cut scores, not lower rates of student learning. Pennsylvania's students and teachers haven't changed; the assessment has changed. Source: PSEA.org

[^0] with State-wide total percentages
** School Building PVAAS growth measures were derived from PSSA and Keystone scaled scores. These will be slightly different than those posted on the SPP.

## 2014-2015 Keystone Exams School Accountability Assessment Results

For 2014-2015, only the results of the Keystone End of Course Assessment results are included.
Grade 11 scores are based on the best score to date for the assessment in which the student participated. Project based assessments are excluded from accountability.

| Year | School | Subject | Grade | \% Advanced | \% Proficient | \% Basic | \% Below <br> Basic | Growth |
| :---: | :--- | :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| $2014-2015$ | BS HS | English Language Arts | 11 | 3.9 | 73.38 | 16.88 | 5.84 | 100 |
| $2014-2015$ | STATE-WIDE | English Language Arts | STATE-WIDE | 8.04 | 64.75 | 19.81 | 7.4 |  |
| $2014-2015$ | BS HS | Math | 11 | 14.47 | 58.55 | 17.11 | 9.87 | 75 |
| $2014-2015$ | STATE-WIDE | Math | STATE-WIDE | 17.66 | 46.82 | 26.48 | 9.04 |  |
| $2014-2015$ | BS HS | Science | 11 | 9.74 | 46.1 | 31.17 | 12.99 | 50 |
| $2014-2015$ | STATE-WIDE | Science | STATE-WIDE | 20.62 | 38.33 | 22.7 | 18.36 |  |

Scores are converted to a 100 point scale.
Growth scores range at the school level from 50 to 100.
50 indicates significant evidence that the achievement level of the group of students was not maintained
75 indicates at least one year's worth of growth,
100 indicates a significant level of growth

YELLOW HIGHLIGHT INDICATES SCORES AT OR HIGHER THAN SCORES STATEWIDE

The Keystone Exams are end-of-course assessments designed to assess proficiency in three subjects: Algebra I, Literature and Biology. In future years, pending funding, additional Keystone Exams will be administered.

The Keystone Exams are one component of Pennsylvania's system of high school graduation requirements. Keystone Exams will help school districts guide students toward meeting state standards.

Significant evidence that the district exceeded the standard for PA Academic Growth
Moderate evidence that the district exceeded the standard for PA Academic Growth
Evidence that the district met the standard for PA Academic Growth
Moderate evidence that the district did not meet the standard for PA Academic Growth
Significant evidence that the district did not meet the standard for PA Academic Growth

Achievement results (PA state assessments) and growth results (PVAAS) must be used together to get a complete picture of student learning.
PA Academic Growth for Science and Keystone content areas (Algebra I, Biology, and Literature):
The standard for PA Academic Growth is met when the student group's actual achievement meets their predicted achievement - based on the average schooling experience in PA.

Report: District Value Added

# Special Education Program STAR ASSESSMENT READING SCALED SCORES 

## 2015-2016

Star Assessment Summary Statement
The Star Reading and Math Assessments provided the learning support program with an additional assessment to monitor reading and math skills and student progress throughout the school year. Students practice reading and spelling skills throughout the year with the READ 180 program software. They also use the leveled library in the Accelerated Reader Program, to pick from reading selections appropriate to their instructional level for independent reading. The IXL math program allows students to continue to practice basic math skills in a sequential fashion, in addition to the classroom math instruction that they receive. The additional minutes spent reading and working on math appears to have helped increase reading fluency, reading comprehension, and basic math skills. The students' scaled scores and grade equivalents, indicate that 37 of the 47 students that were monitored, increased their scaled scores in reading. In math, the scaled scores and grade equivalents of 29 out of 34 students monitored, increased their scores.
